Hi Bill

The normal day is 6 cars moving in and out. I'm sure at different points the flow of cars could be more or less. I'm watching the movements from my cameras to my phone and I've never seen more than 2 vehicles moved in 30 minutes. I estimate that the traffic will be about 1/4 of what is the normal traffic flow now from that location.

Thanks
Pete

Hi Pete:

Attached is an email from the Police Chief commenting on your project. Could you provide a response in writing addressing his concern?

We have you on the agenda for May 27. We are meeting via Zoom. The agenda will have the meeting details for how to join.

Thanks

Bill
