Good Afternoon Bill, after looking at the proposed street lights on Truman Drive at Lyons Estates, we feel that only one light would be necessary mounted on the existing pole at the corner of Lyons and Truman, there is only one other Street light located south about 200' from our entryway down Lyons Road. The neighborhood just before ours has no street lights not even at the entryway, so we don't want our neighborhood to look like a Walmart parking lot, not to mention the cost to the town to maintain all those lights. I am requesting to be place on the Agenda for the 9th Thank you for your cooperation. Can you please send me the Zoom information for the meeting.

Thank you
